Want to concentrate on specific vegetables that are easy to grow and are favorites in most cook books?

The author would like to stress the importance of growing the right type and mix of veggies. This way you get a better crop, and useful veggies that usually go hand in hand with each other.

Don't try to do too much too soon. Don't try to start planting when it's too cold outside. The lowest soil temperature for planting is 40 degrees Fahrenheit. The best soil temperature is around 50 degrees to 60 degrees.

Every successful farmer/gardener has a mentality that considers nature first, before spur of the moment decisions. As an added bonus, planting veggies will turn you into a very observant person.

You know you're a serious farmer/gardener when: you learn to watch the news for a weather forecast; you constantly look at the temperature; you're schedule improves because you need to water your plants at this hour, every day.

Vegetable Gardening Topics...

- Real Men Know Their Dirt
- Small Plots Make for a Great Start
- Your Personal Salad Bar 3
- The Plot Thickens!
- Finally it's Time to Plant!
- Watering Your Plants
- Trimming and Harvesting and Final Thoughts
- Much, much more!
