Functional Histology, 2e

Jeffrey B. Kerr PhD

Functional Histology, 2e Jeffrey B. Kerr PhD

The study of histology requires that students be able to recognise structures within cells and tissues at varying levels of magnification, and understand their function within the human body. Since histology is a visual subject, high quality images of cells and tissues are vital as a component of course material. In this book, concise text relates the structures seen in the images to biological function, and integrates clinical relevance by describing how the histology of tissues is affected in abnormal conditions.

WINNER - Best Designed Tertiary and Further Education Book at the *Australian 58th Annual Book Design Awards*, 20th May 2010

- The book will enable the reader to critically evaluate the microscopic structures of tissues and organs and to recognize the association between morphology and cell activity with
 - Introductory text at the beginning of each chapter summarising the key aspects of morphology
 - A "Macro to Micro" approach, with low magnifications of organs or tissues that enable better appreciation of the relevance of higher magnification images
 - Images and artworks integrated into the text
- Additionally this text reproduces in print format, histologic images that come closer to what is seen down the microscope than any other book. This has been achieved through painstaking preparation of original slides and editing to colour correct where necessary.
- Chapter 1: The Cell, completely revised and expanded to review all the basic concepts of cell biology as it relates to tissue structure and function
- A new Chapter : Origin of Primary Tissues
- Expanded Self-Assessment section to include more 'lookalike' tests on a CD or related website. Will include further reading
- Many more high quality electron micrographs showing cell ultrastructure
- A technical preface that explains the different types of staining techniques and the difference between electron and light microscopy
- Magnification bars and staining information against every micrograph
- Learning objectives at the beginning of every chapter and highlighted key terms
- A CD-ROM or related website that includes additional 'lookalike' Q&As
- All chapters revised and updated; updated clinical notes
- 300+ new images
- New design - A4 double column; figures integrated in text; new artwork
- Many new immunofluorescence images

From reader reviews:

Jennifer Handler:

In this 21st hundred years, people become competitive in each way. By being competitive at this point, people have do something to make these survives, being in the middle of typically the crowded place and notice by surrounding. One thing that occasionally many people have underestimated this for a while is reading. That's why, by reading a publication your ability to survive increase then having chance to stand than other is high. For yourself who want to start reading any book, we give you this kind of Functional Histology, 2e book as beginner and daily reading e-book. Why, because this book is usually more than just a book.

Kristopher Sutherland:

Do you have something that that suits you such as book? The book lovers usually prefer to choose book like comic, limited story and the biggest some may be novel. Now, why not striving Functional Histology, 2e that give your entertainment preference will be satisfied by means of reading this book. Reading behavior all over the world can be said as the means for people to know world better then how they react when it comes to the world. It can't be explained constantly that reading routine only for the geeky person but for all of you who wants to always be success person. So , for every you who want to start examining as your good habit, you are able to pick Functional Histology, 2e become your current starter.

Mary Bolinger:

A lot of book has printed but it is different. You can get it by web on social media. You can choose the best book for you, science, comic, novel, or whatever by simply searching from it. It is named of book Functional Histology, 2e. You can add your knowledge by it. Without making the printed book, it could possibly add your knowledge and make anyone happier to read. It is most essential that, you must aware about guide. It can bring you from one location to other place.

Jean Gonzales:

What is your hobby? Have you heard this question when you got college students? We believe that that question was given by teacher on their students. Many kinds of hobby, Everyone has different hobby. And you know that little person such as reading or as examining become their hobby. You need to understand that reading is very important in addition to book as to be the matter. Book is important thing to incorporate you knowledge, except your teacher or lecturer. You will find good news or update in relation to something by book. Different categories of books that can you go onto be your object. One of them is niagra Functional Histology, 2e.
