Practical Longitudinal Data Analysis (Chapman & Hall/CRC Texts in Statistical Science) David J. Hand, Martin J. Crowder

This text describes regression-based approaches to analyzing longitudinal and repeated measures data. It emphasizes statistical models, discusses the relationships between different approaches, and uses real data to illustrate practical applications. It uses commercially available software when it exists and illustrates the program code and output. The data appendix provides many real data sets-beyond those used for the examples-which can serve as the basis for exercises.
