**Data Processing for the AHP/ANP (Quantitative Management)** Gang Kou, Daji Ergu, Yi Peng, Yong Shi

The positive reciprocal pairwise comparison matrix (PCM) is one of the key components which is used to quantify the qualitative and/or intangible attributes into measurable quantities. This book examines six understudied issues of PCM, i.e. consistency test, inconsistent data identification and adjustment, data collection, missing or uncertain data estimation, and sensitivity analysis of rank reversal. The maximum eigenvalue threshold method is proposed as the new consistency index for the AHP/ANP. An induced bias matrix model (IBMM) is proposed to identify and adjust the inconsistent data, and estimate the missing or uncertain data. Two applications of IBMM including risk assessment and decision analysis, task scheduling and resource allocation in cloud computing environment, are introduced to illustrate the proposed IBMM.

### **From reader reviews:**

#### **Clifford Ranger:**

Now a day folks who Living in the era exactly where everything reachable by match the internet and the resources inside it can be true or not call for people to be aware of each facts they get. How a lot more to be smart in getting any information nowadays? Of course the solution is reading a book. Reading through a book can help men and women out of this uncertainty Information specifically this Data Processing for the AHP/ANP (Quantitative Management) book because this book offers you rich facts and knowledge. Of course the details in this book hundred % guarantees there is no doubt in it you may already know.

#### **Roger Thomas:**

Typically the book Data Processing for the AHP/ANP (Quantitative Management) will bring you to the new experience of reading any book. The author style to describe the idea is very unique. When you try to find new book to learn, this book very acceptable to you. The book Data Processing for the AHP/ANP (Quantitative Management) is much recommended to you to study. You can also get the e-book through the official web site, so you can quickly to read the book.

#### **Jeffrey Lambert:**

Beside that Data Processing for the AHP/ANP (Quantitative Management) in your phone, it might give you a way to get nearer to the new knowledge or information. The information and the knowledge you will got here is fresh from your oven so don't be worry if you feel like an older people live in narrow community. It is good thing to have Data Processing for the AHP/ANP (Quantitative Management) because this book offers for your requirements readable information. Do you occasionally have book but you would not get what it's interesting features of. Oh come on, that wil happen if you have this within your hand. The Enjoyable option here cannot be questionable, like treasuring beautiful island. Techniques you still want to miss it? Find this book and read it from currently!

#### **Louis Ono:**

What is your hobby? Have you heard that will question when you got students? We believe that that question was given by teacher on their students. Many kinds of hobby, Everybody has different hobby. And you also know that little person just like reading or as examining become their hobby. You need to know that reading is very important and also book as to be the thing. Book is important thing to provide you knowledge, except your personal teacher or lecturer. You discover good news or update regarding something by book. Amount types of books that can you choose to adopt be your object. One of them is niagra Data Processing for the AHP/ANP (Quantitative Management).
