This publication, in two volumes, is devoted to the scientific impact of the work of Nobel Laureate, Pierre-Gilles de Gennes, one of the greatest scientists of the 20th century. It covers the important fields for which de Gennes was renowned: solid state (magnetism and superconductivity), macroscopic random media and percolation, supersolids, liquid crystals, polymers, adhesion and friction, and biophysics. The book brings together internationally renowned experts to contribute their perspectives on the significance of de Gennes' works. They have each selected a definitive paper, which gives the state of the field at the time the paper was published, highlights the paper's importance and provides an analysis of the development of the field right up to the modern day. The insightful perspectives of these scientists make the book both unique and intriguing.

This is the first volume devoted to solid state and liquid crystals.

### **From reader reviews:**

#### **John Whetstone:**

Book is to be different for every grade. Book for children until eventually adult are different content. As it is known to us that book is very important for all of us. The book P-G De Gennes' Impact in Science: Condensed Matter and Liquid Crystals (Directions in Condensed Matter Physics) ended up being making you to know about other information and of course you can take more information. It is extremely advantages for you. The reserve P-G De Gennes' Impact in Science: Condensed Matter and Liquid Crystals (Directions in Condensed Matter Physics) is not only giving you more new information but also being your friend when you feel bored. You can spend your own personal spend time to read your publication. Try to make relationship using the book P-G De Gennes' Impact in Science: Condensed Matter and Liquid Crystals (Directions in Condensed Matter Physics). You never sense lose out for everything if you read some books.

#### **Hector Hartung:**

People live in this new time of lifestyle always try to and must have the extra time or they will get wide range of stress from both lifestyle and work. So , once we ask do people have spare time, we will say absolutely indeed. People is human not only a robot. Then we request again, what kind of activity have you got when the spare time coming to you of course your answer can unlimited right. Then do you ever try this one, reading guides. It can be your alternative in spending your spare time, typically the book you have read is definitely P-G De Gennes' Impact in Science: Condensed Matter and Liquid Crystals (Directions in Condensed Matter Physics).

#### **Maria Ives:**

Is it an individual who having spare time and then spend it whole day by simply watching television programs or just laying on the bed? Do you need something totally new? This P-G De Gennes' Impact in Science: Condensed Matter and Liquid Crystals (Directions in Condensed Matter Physics) can be the answer, oh how comes? A fresh book you know. You are so out of date, spending your free time by reading in this new era is common not a geek activity. So what these books have than the others?

#### **Susan Hare:**

In this particular era which is the greater individual or who has ability in doing something more are more valuable than other. Do you want to become among it? It is just simple strategy to have that. What you have to do is just spending your time almost no but quite enough to have a look at some books. On the list of books in the top collection in your reading list is P-G De Gennes' Impact in Science: Condensed Matter and Liquid Crystals (Directions in Condensed Matter Physics). This book which can be qualified as The Hungry Hills can get you closer in turning into precious person. By looking way up and review this e-book you can get many advantages.
