The Molecular Gaze: Art in the Genetic Age (Cold Spring Harbor Laboratory Press Series on Genomics, Bioe) Suzanne Anker, Dorothy Nelkin

The gene has become a cultural icon and an increasingly rich source of imagery and ideas for visual artists. Drawing on a wide range of contemporary painting and sculpture, *The Molecular Gaze: Art in the Genetic Age* explores the moral and bioethical questions these works address. What does it mean to be human? What is "identity" in a society of genetically manipulated individuals? Questions like these are growing louder as genetic technology advances and the public examines the ethical consequences more widely. Suzanne Anker and Dorothy Nelkin, an artist and a social scientist, have written a thought-provoking and visually fascinating book for scientists, artists, students, and general readers intrigued by the anxiety and exhilaration of the genetic age.
